

## ReadME!!

Please note that all images were generated using Meta AI, they are open source.

Chat GPT was used to write the descriptions and create fictional names for books.

—> Except images with the authors, the links to the author pages are included in the author section(for credit).

The site features MANY products, developing product descriptions was not feasible, so only the items in the cart have descriptions  
A template for the format of product descriptions is applied for all products except:

- The Midnight Chronicles
- The Journal
- The Bookmarks

Social Media links DO NOT work, for obvious reasons.

AND Emails, Newsletter, Payment(they are static).

Most style-sheets are separate except in Product descriptions where one sheet serves as the template for all(they look the same, just different products).
